- A. *Certificate required.* No rezoning or variance to zoning provisions shall be granted, nor shall construction, alteration, repair, rehabilitation or relocation of any building, structure or other improvement to real property situated within the TO, Technology Overlay Zone, be performed without the issuance of a certificate of appropriateness by the TTCDA. The TTCDA shall within a reasonable time period, but in no case more than sixty (60) days following initial consideration of an application by the authority meeting in regular session, grant a certificate of appropriateness with or without attached conditions, or deny the certificate, and shall state in writing its reason for approval or denial. Failure by the TTCDA to act upon an application within the required time period shall constitute approval of the certificate, unless an extension is granted by request of the applicant. Approval of a certificate of appropriateness for rezoning does not constitute an amendment of the zoning. Approval of a certificate of appropriateness for a variance does not constitute approval of the variance. Approval of a certificate of appropriateness for a building permit does not constitute issuance of a building permit.

A. *Minimum data requirements.*

- 1. *Rezoning.* The minimum submission for a certificate of appropriateness for zoning shall be a copy of the application for rezoning submitted to the planning commission.
- 2. *Variance.* The minimum submission for a certificate of appropriateness for a variance is all information needed to show that the variance is necessary, due to unique circumstances not created by the applicant, to relieve the applicant of undue hardship created by the requirements of the TO, Technology Overlay Zone or the base zoning district; that the variance is the minimum necessary to allow the use of the land in the same way as other land in

the same zone; and that the relief sought may be granted without substantially impairing the intent of the TO, Technology Overlay Zone, the base zone or the Tennessee Technology Corridor Comprehensive Development Plan.

3. *Building permit or grading permit.* A development plan for an entire parcel, even when development phasing is being considered, must be submitted to the TTCDA for approval prior to the TTCDA issuance of a certificate of appropriateness for a building or grading permit. The development plan shall meet all the requirements of the minimum regulations for the subdivision of land in the county and shall be accompanied with information required by the adopted procedures of TTCDA.

B. *Supplemental data.* Dependent upon the nature of the development proposal, supplemental data, as described below, may be required by the TTCDA. For all planned zones, including PR, Planned Residential, PC, Planned Commercial, BP, Business and Technology Park, SC, Shopping Center, T, Transition, and OS, Open Space, the same data and the same guidelines used by the TTCDA will be applied by the planning commission in addition to the planning commission's data and guidelines, which shall also be applied. All plans must be prepared by a registered engineer or architect.

1. A description of all operations proposed in sufficient detail to indicate the effects of those operations in production of excessive auto and traffic congestion or problems of noise, glare, odor, sewerage, smoke, air pollution, water pollution, fire or safety hazards, or other factors detrimental to the health, safety, and welfare of the area. See section 4.10, "Supplementary regulations applying to a specific, to several, or to all zones," section 1, "Performance standards for commercial and industrial uses."
2. A plot plan indicating the location of present and proposed buildings, driveways, parking lots, landscaping and signs, other necessary uses, and any development phasing.
3. Preliminary architectural plans showing elevations, areas, height, materials and other information necessary to evaluate proposed building(s).
4. An estimate of the maximum number of employees contemplated for the proposed development and the number of employees per shift.
5. A storm drainage plan which includes accurate existing and proposed water courses; the system of open channels, pipes, culverts, drains, inlets, catch basins, and similar facilities designed to handle storm water in times of rainstorms, the calculations used in the design of such systems and the easements required in the construction and maintenance of the drainage system. Erosion and sediment control measures suggested in the Knox County Erosion and Sediment Control Handbook, 1981, or subsequent editions, shall be utilized.
6. Other engineering and architectural plans including a designation of sewers to be used and plans for abating any effects described in subsection 1., above, or any other nuisances. All sewage disposal systems and land requirements for such systems must be approved by the county health department before a certificate of appropriateness can be issued.
7. Any other information the TTCDA may need to adequately consider the effect that the proposed uses may have upon their environment and on the cost of providing public services to the area.

5.90.10. *Stop order.* A stop order will be issued if construction of any part, or phase, of the development is not in compliance with the approved plans.

5.90.11. *Revisions of development plans.* A revised development plan shall be submitted to the TTCDA for approval of any changes, or extensions to the development plan. This shall include previously approved certificates of appropriateness for building, grading or sign permits. TTCDA may approve revised development plans which are consistent with this resolution and with Tennessee Technology Corridor Design Guidelines. Minor revisions to development plans may be approved by the TTCDA executive director, or designee, provided such changes:

- A. Do not alter the basic relationship of the proposed development to adjacent property or streets and roads.
- B. Do not alter the uses permitted.
- C. Do not increase the area of development by more than five (5) percent of the previously approved square footage.
- D. Do not require the approval of a waiver to the Tennessee Technology Corridor Design Guidelines, or a variance to the zoning ordinance for the county.

5.90.12. *Appeal of authority actions.* Any interested party who is aggrieved by any action of the TTCDA including the approval or denial of a certificate of appropriateness may appeal its decision to the county board of commission by filing an appeal on the designated form and paying such filing fees as may be required within thirty (30) days of the action of the TTCDA. The action that is appealed may be overruled by an affirmative majority vote of the county board of commission. All appeals shall be heard within sixty (60) days of filing of application for appeal. Appeal from the action of the county board of commission shall be by writ of certiorari as provided in the general law and shall be filed within thirty (30) days of such action.
